Minutes, Notes, and Happenings of last months' meeting

Last month's meeting was held on Tuesday September 12th. We had 17 members in attendance, and three guests; The wife of member Terry S., Mike K., who is a member of our host church, and collects a little bit of everything but enjoys foreign coins the most, and Mary Ann S., mother of member Michael S. who likes gold coins.

Two guests Mike K. and Mary Ann S. decided to join the club.

The meeting was called to order by President Bob C. at 7:01.

There were various papers and magazines.

Bob talked about the Jeffco show which was slow.

Bob then reported on upcoming Coin Shows.

Bob reviewed items from his President's Notes section of the Newsletter.

He also discussed a robbery that had taken place at member Gene M. coin store up in Loveland. He said some of the stolen items had come into the shop where he works (Tebo) and also into the CollecTons shop in Boulder. Because of the knowledge of the theft and being able to recognize some of the stolen items, two individuals were arrested (one at each location).

Bob reviewed the Coin of Month, Raffle, and Door Prizes.

A motion was made and seconded to approve the minutes that were in the Newsletter.

A motion was made and seconded to approve the Treasurers reports. We currently have \$2577.98 in the club account. (Remember that any adult member may see the complete Treasurer's report by simply requesting to view it at the meeting.)

Program

The program was on “Early Mexican Coins” by club member Dave G. The Mexican Coins were really the history of early Spanish coins that were used in the Mexico colonies. Between 1500 and 1800 85% of the gold and silver came from the “New World”. Spain had 12 mints in the New World that produced gold and silver coins that could then be taken back to Spain. The first of these mints was in Mexico City in 1535. The first date on a coin was in 1607. Most of the coins were based on the 8 Reales or “Pieces of Eight”. Gold coins were called Escudos where 16 Reales equaled 1 Escudo.

1. **When coin collecting in the United States finally took off**, October 16, 2017 (digital edition) by Q. David Bowers of Coin World. **Story Summary:** By the 1830s, several hundred coin collectors were active in the United States, with that number starting to grow in the 1850s, writes Q. David Bowers in "Joys of Collecting." The big boost came in 1858 when the government stopped issuing half cents and replaced the old copper large cent with a smaller copper-nickel cent. "A wave of nostalgia swept across America," Bowers writes, adding "A scramble ensued to acquire one of each date of cent minted since 1793. ... By 1858, with Flying Eagle cents common in circulation and copper coins disappearing, a great passion arose for collecting cents."

The finders were the treasure hunting team of Sean Scargill and Hugh Jenkins. They have been detecting in and around Lincolnshire for four years. 4. **1943-D Bronze Cent makes a TV appearance, sort of**, October 5, 2017 by Coin Collectors Blog. **Story Summary:** Fans of the NBC show The Blacklist that watched on Wednesday, October 4, would have noticed there was a numismatic role added to the script. Raymond Reddington, played by James Spader, was trying to gain the attention of a high-rolling thief and found himself at a numismatic auction. The item up for bid was the 1943-D Bronze Lincoln cent. As part of the story, it was announced that it was the only one known to exist (there are others) and that it was graded by the Professional Coin Grading Service. Of course, they did not use a real 1943-D Bronze Lincoln cent and there was a mistake when the coin showed up later in the story. But if you have not seen this episode, I am not going to spoil it for you!

Interesting Coin Facts

Even though the recorded mintage of the 1877 Indian Head Cent is 852,500 while the 1909-S Indian Head Cent is 309,000 (almost 3 times less). The value of the 1877 is typically 3 to 3.5 times more than the 1909-S at the same grade level. It is all about survival rates, and more of the last years' production survived making them less valuable.
