The meeting was called to order by Vice-President Terry K at 7:06.

Terry also talked about a Mule note from 1899 with a \$1/\$2. NGC just came out with a site that lists the 50 most counterfeited coins.

Terry reviewed the upcoming coin shows in the area.

The program was “Niobium Coins” by Vice-President Terry K. Niobium is a metal element that was formerly called Columbium. The leading producer in the world is Brazil. It is used to strengthen steel with just 0.1% needed. Color diffraction of light occurs with a very thin layer of the metal. This allows colorful coins to be produced. Austria has produce a series of coins depicting many things and events.
